GREAT DEALS on our favorite items from inside this issue

anatomy of a green kitchen

Using high-quality yet low-impact materials, interior designer Cheryl Terrace shows us how she created a luxe eat-in retreat.

wheatboard cabinets

The custom cabinets are made of renewable wheatboard, a straw-based alternative to off-gassing particleboard, and nontoxic glues. For the door facades, Terrace chose sustainable maple veneer finished with M.L. Campbell low-VOC white paint. "Flat Slab" cabinetry ABOUT \$850/LINEAR FOOT, GREENRIDGE SPECIALTIES (717) 463-3739

recycled backsplash

These translucent 1" tiles are 100 percent recycled glass and come in a range of beautiful colors. *Mosaic tile sheet in Ash* \$20/SQUARE FOOT, ECO-FRIENDLY FLOORING (866) 250-3273

sustainable wood veneers

The base cabinets, also wheatboard, are faced with sustainably harvested walnut veneer. "Flat Slab" base ABOUT \$850/LINEAR FOOT, GREENRIDGE SPECIALTIES (717) 463-3739

earth-friendly countertops

The island is shiny Caesarstone, a quartz composite produced by a conscientiously run company that recycles 97 percent of the water used in manufacturing. For the counters, Terrace opted for a matte, river-washed granite. **BTW:** Stone such as granite requires a lot of energy to quarry, but is extremely durable and won't off-gas, as man-made materials often do. *Caesarstone (on island)* FROM \$85/SQUARE FOOT, CAESARSTONEUS.COM FOR STORES "Verde Labrador" *ubatuba granite (at perimeter)* \$26/SQUARE FOOT, MARBLEMASTER (760) 607-0903

natural stone flooring

The pale limestone tiles help save on both heat and AC. In summer, the stone feels cool underfoot (with shades closed), and it retains the sun's warmth in the winter. "Pewter" FROM \$14.44/SQUARE FOOT, ANNSACKS.COM FOR STORES

3 SMART APPLIANCES TO FINISH AN ECO SCHEME

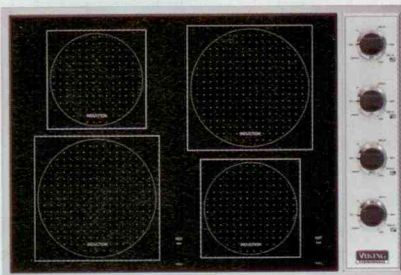

bosch dishwasher

To conserve resources, it customizes the water level and temperature to the dirtiness of your dishes. "Evolution 800 Series" \$1,799 BOSCHAPPLIANCES.COM FOR STORES

viking range

Way futuristic, this induction cooktop harnesses magnetic energy to heat the pot, not the stove—twice as efficient as electric. 30" "Professional" FROM \$3,000 VIKINGRANGE.COM FOR STORES

sub-zero fridge

Even a fancy refrigerator can be green! (It consumes 15 percent less energy than non-EnergyStar models.) #611/S \$6,543 SUBZERO.COM FOR STORES
